## **United Mines Landfill Drilling Program**

30/03/09

Dear [Name]

In the latest United Mines Newsletter we communicated that drilling of additional landfill gas extraction wells will be commencing on the 10<sup>th</sup> April, but stressed at the liaison group that we hoped to improve on this.

SITA and our gas contractor have successfully managed to secure an improvement in the drilling program and drilling will now commence on the 31<sup>st</sup> March 09. Works should continue for around 2 weeks but SITA will also be driving the contractor for early completion.

As you know drilling of gas extraction wells are required to control gas and odour but the process itself, by drilling through waste can create gas and odour, but SITA and it's contractors shall take all reasonable steps to reduce the impact to a minimum.  
Yours sincerely

Stuart Higgins  
Treatment Manager
